

Oompa Loompa Crisp Packets

You will need: a keyring - empty crisp packet - access to an oven
soap & water - greaseproof paper

Empty out your crisps into another bag (or eat them). Then wash out your crisp packet with soap and water. Put your packet on greaseproof paper and fold the greaseproof paper over the top of the crisp packet, so it is covered. Place on a baking tray. Ask an adult to set the oven to 170 degrees and put the baking tray in the oven for 2-3 minutes. Let your packet cool down and then use a hole puncher to attach the keyring.

What has happened to the size?
